Report on "Selection of a Journal for Research Publication"

1. Title of the Event/Activity/program	Online Guest lecture on "Selection of a Journal for Research Publication"
2. Date and Time	30 April 2024, from 3:00 PM to 6:00 PM. (IST)
3. Mode of conduct (Physical/Online)	online
4. School	School of Sanskrit, Philosophy and Indic Studies
5. Detail of the Resource Person (Brief biodata)	<p>Dr. Murari P. Tapaswi is a professional in the field of library and information science, providing information services to academics and researchers for about the last 50 years. He was associated with the CSIR-National Institute of Oceanography (CSIR-NIO), Goa, for about 34 years and thereafter with Goa University for about 6 years. He was also associated with the activities of UN organizations such as the Food and Agriculture Organization (FAO) and Intergovernmental Oceanographic Commission (IOC) of UNESCO for several years for the development of marine science databases guided in orientation programs and interacted with the international community. He also is a freelance translator for the English-Marathi language pair and has been honoured by conferring the 'Best Librarian' Award of 2013 by the Govt. of Goa.</p>
6. Number of participants	76

<p>7. The objectives of the Program/activity/event</p>	<p>The guest lecture aimed at informing researchers about the nuances and parameters to be considered while deciding which of the UGC-Care Lists best suits their area of expertise and short-listing the best journal for their publication. Additionally, it aimed at educating researchers on identifying predatory and hijacked/cloned journals and steering clear of them. Finally, the talk aimed to introduce AI tools to assist researchers in identifying the right journal for their research publication.</p>
<p>8. Benefit/Key outcomes of the Program/activity/event</p>	<p>Participants gained insights into navigating the dynamic UGC-CARE List, discerning reputable journals, and avoiding predatory publications. They learned to identify additional parameters for optimal journal selection, tailored to their expertise. Participants understood the evolving landscape of Open Access journals and how to avoid predatory and hijacked/cloned publications. Ultimately, the event empowered researchers with AI tools to efficiently identify suitable journals for their research, fostering informed decision-making and enhancing the quality and impact of scholarly dissemination.</p>
<p>9. Enclosures with report</p>	<p>The recording of the lecture is available at https://youtu.be/nm0hilGfebo, attendance, poster and screenshots.</p>

Selection of a Journal for Research Publication

30 April 2024 (Tuesday)
3:00 PM to 6:00 PM IST

An online lecture by

Dr. Murari P. Tapaswi

Chief Scientist (Retired)

CSIR-National Institute of Oceanography, Goa

meet.google.com/ztt-kksk-xbr

Abstract

Since mid-2019, white lists of journals under the banner ‘UGC-CARE List’ have been in place to guide the researchers in which journals they should publish their research results. However, one needs to understand well, especially while consulting group II lists, since not all items within the list are recognized by UGC-CARE. These lists are dynamic. Journals get added and removed. It is therefore important to know which journal is likely to last long on the lists. There are some additional parameters to make a decision on which of the lists suits best for your area of expertise and how you could short-list the best journal for your publication. ‘Open Access journals’ were introduced sometime in the last decade of the 20th century. This has given birth to the predatory and hijacked/cloned journals. A researcher needs to understand how to identify these and distance from them. The talk ends with some AI tools that help in identifying the right journal for your research.

Bio

Dr. Murari P. Tapaswi is a professional in the field of library and information science, providing information services to academics and researchers for about the last 50 years. He is invited to deliver talks on the areas that are of interest to researchers, especially on Research Ethics and Research Methodology, and to the professionals in information science. He was associated with the CSIR-National Institute of Oceanography (CSIR-NIO), Goa for about 34 years and thereafter with Goa University for about 6 years. Therefore, he had an opportunity to closely interact with academics and researchers, understand their needs, and find adequate solutions to meet those. Besides standard library and information services, he acquired vast experience in institutional information handling and dissemination.

With a Master's degree in Science, Documentation & Information Science, and a Ph.D. in Scientometrics, he developed an interest in applying those techniques in areas such as information handling, and research productivity measurement. While at CSIR-NIO, he was also associated with the activities of UN organizations such as the Food and Agriculture Organization (FAO) and Intergovernmental Oceanographic Commission (IOC) of UNESCO for several years, for the development of marine science databases, and guided in orientation programs, and interacted with the international community.

As a post-retirement activity, he continues to share his experiences in invited talks, be a consultant, writes a blog in Marathi on research achievements of Indian laboratories, and is a freelance translator for the English-Marathi language pair. He has been honoured by conferring the 'Best Librarian' Award of 2013 by the Govt. of Goa.
