Report on Student-Centric Practice – Diagnostic French Language Test

A diagnostic test on 4 competencies of the French language (Oral and Written Comprehension & Oral and Written Expression) was conducted in the month of June 2024 by Mr. Anthony Gomes and Ms. Shourya Dalvi, Assistant Professors in French for the incoming M.A. Part 1 students of French. 5 students registered for M.A. Part 1 in the Academic Year 2024-2025.

The objective of the diagnostic test was to assist the students in identifying their current level in the French language and subsequently take constructive action towards the targeted improvement of the competencies. The test was conducted based on the format of the DELF exams.

The results of the tests were discussed individually with the students by the two faculty members and constructive feedback was provided. Based on their levels, the students were counseled on the choice of elective courses so that they could take proactive steps in improving their language skills.
