# CIRCULAR

Ref: GU/Acad –PG/BoS -NEP/2024/151 dated 27.05.2024

In supersession to the above referred Circular, the Syllabus of the **Bachelor of Arts in Psychology** Programme is attached with following changes:

- 1. Included list of Courses offered under the Double Major.
- 2. Number of Credits for Course PSY-221 'SPORTS PSYCHOLOGY' shall be 3 Theory +1 Practical instead of 4 Theory.
- 3. Added Exit Course for Semester IV PSY-261 'LIFESKILLS FOR YOUTH WELLBEING'.

The Dean/ Vice-Deans of the D.D. Kosambi School of Social Sciences and Behavioural Studies and Principals of the Affiliated Colleges offering the **Bachelor of Arts in Psychology** Programme are requested to take note of the above and bring the contents of the Circular to the notice of all concerned.

(Ashwin V. Lawande) Deputy Registrar – Academic

#### To,

- 1. The Dean, D.D. Kosambi School of Social Sciences and Behavioural Studies, Goa University.
- 2. The Vice-Deans, D.D. Kosambi School of Social Sciences and Behavioural Studies, Goa University.
- 2. The Principals of Affiliated Colleges offering the Bachelor of Arts in Psychology Programme.

### Copy to:

- 1. The Director, Directorate of Higher Education, Govt. of Goa
- 2. The Chairperson, BOS in Psychology.
- 3. The Controller of Examinations, Goa University.
- 4. The Assistant Registrar, UG Examinations, Goa University.
- 5. Directorate of Internal Quality Assurance, Goa University for uploading the Syllabus on the University website.

# SEMESTER I & II

Name of the Programme : BA PSYCHOLOGY

**Course Code** 

Course Code : PSY-100

Title of the Course : ESSENTIALS OF PSYCHOLOGY

Number of Credits : 3+1

Effective from AY : 2023-24

Effective from AY	: 2023-24	
Pre-requisites	Nil	
for the Course:	6/64/88/10	
Course Objectives:	<ol> <li>Understand the subject of psychology as a science</li> <li>Understand psychological processes and conduct basic experime psychology.</li> <li>Develop knowledge of cognitive processes</li> </ol>	nts in
		No of Hours
	CHAPTER I: NATURE OF PSYCHOLOGY	
Content:	<ol> <li>Psychology as a Science: Beginnings of psychology as a science, scientific way of thinking, Scientific method.</li> <li>Applied Psychology &amp; Psychology Careers         Psychology as a Career &amp; Mental Health Professionals, Psychology &amp; Work, Psychology Beyond the Classroom, Psychology &amp; Law, Sports Psychology, Psychology in India     </li> <li>Contemporary Approaches to Psychology: Behavioral, Psychodynamic, Cognitive, Sociocultural Approaches, Humanistic Movement and Positive Psychology</li> <li>Skilled Based Activities: Interviewing mental health professionals, Field visits to relevant industries to observe the process of appraisal and organizational procedures after which students will have to compile a report.</li> </ol>	15
	<ol> <li>CHAPTER II: BASIC CONCEPTS OF PSYCHOLOGICAL PROCESSES</li> <li>States of consciousness: Normal waking consciousness (Directed consciousness, Flowing consciousness, Divided consciousness), the unconscious mind and altered states of consciousness (Meditation, Hypnosis, Mesmerism, Depersonalization, Near death experiences)</li> <li>Emotions: Nature and types of emotions, expression of emotions (cultural and emotional expressions and labelling) managing negative emotions (management of examination anxiety) and enhancing positive emotions (emotional intelligence)</li> <li>Motivation: Types of motives and Maslow's hierarchy of needs Skill based activities: Maintaining journal of emotions, use of psychological test to understand ones own nature of motivation</li> </ol>	15

8

	CHAPTER III: BASIC COGNITIVE PROCESSES -1	
	1. Nature of Sensation and Perception: Dimensions of Perception,	
	Mental imagery	
	2. Learning and memory: Types of learning, Conditioning: Classical	
	and Operant and Observational Learning Memory: Stages of	
	Memory: Encoding, Storage, Retrieval; Methods of Retention:	
	Recall, Recognition, Relearning; Memory enhancement	
	techniques and study habits	15
	Problem Solving and reasoning: Trial and error, algorithms,	
	heuristics – Availability heuristic, Representative heuristics	
	Anchoring and adjustment, Escalation of commitment, Emotions	
	and decision making, Naturalistic decision making	
	Reasoning: Deductive and Inductive reasoning, creativity.	
	Skill based activities: Use of mnemonic devices to learn and	
	forming a study habit calendar	
	PSYCHOLOGY PRACTICUM	
	Experiments: Any 5 from the list given below	
	1. Learning efficacy of meaningful and meaningless verbal material	
UNIVER	2. Comparative study of recall and recognition as tests of retention	
(3)	3. Fluctuation of attention	
	4. Optical Illusion: Muller – Lyer	312
4 600	5. Depth Perception	
0 4 1	6. Reaction Time	
	7. Stroop Effect	
The Court of	8. Concept Formation (using cards or blocks)	30
Continue Day	9. Zeigarnik Effect	2)
	Psychological Tests : Any 03 from the list given below	
	Mobile Phone Addiction Scale (Velayudhan)	
	A COMPANY OF THE STATE OF THE S	
	2. Bell's Adjustment Inventory-Student form / Global Adjustment	
	Scale (Responsible Annual Annu	
	3. Environmental Awareness Ability Measure (Praveen Kumar Jha)	
	4. DAT or David's Battery of Differential Ability (Verbal Ability)	
	5. Any Personality Test.	
	1. A blend of traditional teaching techniques- lecturing and problem	n-based
	learning may be used in the classroom.	
	2. The ideas addressed in this course can be better explored through	h
	experiential learning tools such as group discussions, role play, de	ebates,
Pedagogy:	flipped learning demonstrations and sharing of experiences, amo	ng
	others, during lectures.	
	3. Facilitators are also encouraged to use ICT tools such as Power Po	oint
	Presentations/ Ted talks/documentaries of science to facilitate	
	engagement with syllabus topics.

	3. Appreciate the nature connectedness.					
	4. Understand the impact of climate change and behaviour and					
	5. Comprehend the role of the environment on health and quality of life					

Name of the Programme : BA PSYCHOLOGY

Course Code : PSY-142

Title of the Course : STRESS MANAGEMENT

Number of Credits : 03 (1 + 2) Effective from AY : 2023-24

Effective from AY	: 2023-24	
Pre-requisites	III OB UNIVERSIA	
for the Course:		
	1. Expose students to a holistic approach to stress management and	foster
Course	interest in stress management as a field of study and research	
Objectives:	2. Enable students to adopt effective stress management techniques	
	3. Engage students in experiential learning.	
	विपाविष	No of
		Hours
	CHAPTER 1: UNDERSTANDING STRESS	
	<ol> <li>Conceptualizing Stress – Components of stress, Types of stress</li> </ol>	
	2. Reaction to Stress – Physiological stress reactions, Psychological	
	stress reactions, Reactions based on Personality types,	05
	Psychological hardiness, Resilience	
AUNIVER	3. Signs of stress and identifying them	<b>N</b>
39/	4. Sources of Stress Throughout Life	
67000	CHAPTER 2: STRESS AND HEALTH	10
	1. Diathesis stress model	7/4
C 1 2 2 2 2	2. Burnout: meaning, burnout stress syndrome, distinct stages of	12
Call Ext	burnout burnout	
किया विश्वार	3. Stress and its effects on Health- Stress, behaviour and Illness,	05
Victoria Div	4. Adjusting to a chronic illness- Initial Reactions to Having a Chronic	
	Condition, Influences on Coping with a Health Crisis, The Coping	
Content:	Process	
	CHAPTER 3: STRESS-PREVENTION STRATEGIES	
	1. Reducing the Potential for Stress- Enhancing Social Support,	
	Improving One's Personal Control, Organizing One's world Better,	
	Exercising: Links to Stress and Health, Preparing for Stressful Events	
	2. Reducing stress: Behavioral and cognitive methods- relaxation,	
	biofeedback, systematic desensitization, modeling, Approaches	05
	Focusing on Cognitive Processes.	
	3. Specific Coping Strategies – Problem solving, Catharsis, Crying, Faith,	
	Meditation, Humour, Distraction	
	4. Emotion focused coping: Enhancing emotional awareness, releasing	
	pent-up emotions, managing hostility and forgiving others.	
	PRACTICUM COMPONENT	
	1. Conduct Psychological test to measure any two aspects of their	60
	personality	

- Any test measuring psychological aspects of perceived stress, burnout, stress coping techniques (Eg: Stress coping techniques questionnaire, Academic Stress Questionnaire, Students' Stress Scale for University Students)
- Any test measuring physiological symptoms of stress
- Any 2 scales on determinants of stress: stress-prone or stressresistant personality traits; locus of control; self-esteem; social support; optimism/ pessimism; assertiveness
- 2. Experiential exercises any two
- Impact of external stress on task performance (Repeated measures design- same task to be performed in external pressure and no pressure situation- scores and introspective report to be analyzed)
- Impact of rational/ positive thinking on stress (Participants are to be provided a vignette in which they imagine themselves in a stressful situation- in the first conditions they can be asked to imagine all things that can go wrong/ catastrophize, in the second they have to think of the same situation in a positive/ rational light- their selfreports of stress to be compared in both situations)
- Impact of learned helplessness on problem solving (Participants divided into 2 groups of 3 participants each; and are given 3 anagram word problems to solve; Group 1 given 2 impossible problems and 1 possible problem; Group 2 given all possible problems: Participants asked to raise hands after completion of task- Group 1 may develop learned helplessness and not attempt problem solving in the third task, even though the task is the same as given to group 2)
- Impact of humour/ laughter on mood (8-9 participants can be asked to participate in a laughter therapy exercise/ hans yoga- for 10 minutes and introspective report to be taken on each participant's mood before and after experiment- comparison of introspective report for analysis)

#### 3. Qualitative Practicum:

- Focus group discussion (with 5-8 participants), or interviews (with minimum 3 participants) or survey (around 25 participants) on coping strategies used in times of academic stress- - compilation of data to be done in practical batches- for coding common emerging themes
- Time management and stress: Design and maintain a time table for a week and follow it- write a report on how it impacts stress management- compilation of data to be done in practical batchesfor coding common emerging themes
- 4. Workshop/ skill training

Practice any one technique within yoga or meditation (eg: breathing techniques/ pranayam, or Asana) for 2 weeks and maintain a diary about how it is impacting sleep, positive/negative thoughts, physical stress symptoms (eg: pain) and general stress in life compilation of data to be done in practical batches- for coding common emerging themes Or Plan & maintain personal fitness program, Workshop on healthy eating/nutrition and maintain a diary about how it is helping them manage their schedule 5. Each batch of students should plan, design, and conduct structured exercises on any of the following areas: Self-awareness; decision making and problem solving; behaviour modification; conflict management; goal setting; wheel of wellness; stress awareness diary; healthy diet and nutrition; fitness; gratitude journal 1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. 2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, Pedagogy: during lectures. 3. Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics. **BOOKS FOR STUDY:** 1. Andrews, T. (2016). The Healers Manual. Minnesota. Llewellyn Publications. 2. Carr, A. (2004). Positive Psychology: The science of happiness and human strength.UK: Routledge. 3. New Delhi: Thomson Delmar Learning. 6. Davis, M., Eshelman, E., & McCay, M. (2019). The relaxation and stress reduction workbook (7th ed.). Oakland, CA: New Harbinger. At the end of this course, the learner will be able to: 1. Identify and understand the meaning of stress. Course 2. Distinguish methods to control and reduce stress in their daily life. **Outcomes:** 3. Apply stress management techniques. 4. Explore the relationship between stress, and health 5. Develop a personal stress management plan.

# **EXIT COURSE**

Name of the Programme : BA PSYCHOLOGY

Course Code : PSY-161

Title of the Course : MINDFULNESS

Number of Credits : 4 (2+2)

Effective from AY : 2023-24 : 2023-24

Effective from A1	: 2025-24	
Pre-requisites	It is considered an exit course in psychology and hence students sho	uld
for the Course:	meet the criteria for exit with a major paper in psychology	
Course Objectives:	<ol> <li>Understand the basic principles and concepts of mindfulness</li> <li>Appreciate the connection of mental health and well-being,</li> <li>Develop the ability to be fully present, with attention to the moment.</li> <li>Learn the skills of mindfulness practices and meditation.</li> </ol>	present
	A-8	No. of
	TINILLA	Hours
	UNIT1: PRINCIPLES OF MINDFULNESS  A: UNDERSTANDING MINDFULNESS  i. Definition of mindfulness and its origins  ii. Developing mindfulness  iii. The benefits of mindfulness  iv. Emerging science of mindfulness	10
Tawa artis	B: MINDFULNESS OF THE BODY AND THOUGHTS  i. Introduction to mindful breathing  ii. Recognizing and understanding thoughts  iii. Cognitive diffusion	10
Content:	C: MINDFULNESS IN DAILY LIFE  i. Importance of gratitude  ii. Mindfulness and self-care  iii. Mindful communication  iv. Mindful technology use	10
	<ul> <li>UNIT 2: PRACTICING MINDFULNESS <ol> <li>Mindful breathing exercises (Body scan and awareness breathing)</li> <li>Mindful eating and drinking</li> <li>Mindful walking</li> <li>Mindful walking</li> <li>Mindfulness forgiveness</li> <li>Gratitude letters</li> <li>Gratitude practices eg gratitude tree/jar/garden</li> <li>Mindful Journaling</li> <li>Mandala</li> <li>Mindful listening</li> <li>Loving-kindness meditation</li> </ol> </li> </ul>	60

	<ul> <li>Students have to choose a minimum of 06 activities from the above mindful practices and practice each of them for a minimum of 10 hours each</li> <li>Evaluation of the student would be based on viva and the ability to demonstrate or teach any one of the above mindful</li> </ul>
	/meditation skills
Pedagogy:	<ol> <li>A blend of traditional teaching techniques, experiential-based exercises and workshops</li> <li>Tools such as group discussions, role play, and sharing of experiences, among others, during interactions.</li> <li>Field trips to nature are encouraged to enhance the mindfulness experience.</li> </ol>

	10. Hanh, T. N., & Cheung, L. (2011). Savor: Mindful eating, mindful life. San
	Francisco: Harper One.
	At the end of this course, the learner will be able to:
Course	Understand the basic principles and concepts of mindfulness.      Develop the shill to be seen their extention on the present moment.
Course	2. Develop the ability to focus their attention on the present moment.
Outcomes:	3. Explain the various mindfulness practices in daily activities.
	4. Incorporate mindfulness into daily life and maintain a regular mindfulness practice.

# **SEMESTER III**

Name of the Programme : BA PSYCHOLOGY

Course code : PSY-200

Title of the Course : ATTITUDES AND SOCIAL COGNITION

Number of Credits : 3T + 1P Effective from AY : 2024-25

Effective from AY	: 2024-25	
Pre-requisites	The student should have completed the basic psychology course	es in the
for the course	previous semester. (1) / (2) (2) (1)	
	1. Evaluate the processes of attitude formation.	
Course	2. Comprehend the causes of stereotypes.	
Objectives:	3. Assess non-verbal communication along with its various chan	nels and
	understand the concept of impression formation.	
	A salle a man	No. of
		Hours
	CHAPTER I: ATTITUDE	
	1. Nature and origin of attitudes	
	2. Processes of attitude formation: Classical conditioning,	
	Instrumental conditioning, and Observational learning.	5)
AUNIVER	3. Emotions and attitude change.	
	4. The science of persuasion: How attitudes are changed?	2/2
670000	Persuasion (Communicators, Messages, and Audience), The	12
	cognitive processes that underlying persuasion and	
C/# 12	systematic vs heuristic processing.	
THE STATE OF THE S	5. The power of advertising: How advertising works and	
Prayfact.	Subliminal advertising.	
Michigan Da	6. Resisting attitudinal / persuasion attempts: Reactance.	
	Forewarning, Selective avoidance, Counterarguing, Individual	
	differences and Ego depletion.	
Content:	CHAPTER II: STEREOTYPES, PREJUDICE AND DISCRIMINATION.	
	1. Nature and origins of stereotyping: Defining Prejudice,	
	Cognitive component: (Stereotypes), Affective component:	
	Emotions (Prejudice), and the behavioural component:	
	(Discrimination).	
	2. Causes of prejudice: Pressures to conform: Normative rules,	
	Social identity theory: US versus THEM (Ethnocentrism,	
	Ingroup bias, Outgroup homogeneity, Blaming the victim and	11
	Justifying feelings of entitlement and superiority), and Realistic	
	conflict theory.	
	3. Techniques for countering /reducing prejudice: Learning not	
	to hate, Benefits of contact, Recategorization, Guilt and	
	prejudice reduction, Saying no to stereotypes and biased	
	attributions and Social influence.	
	(field trip to NGO working with discriminated populations)	

	CHAPTER III: SOCIAL COGNITION	
	1. Heuristics and types: Representativeness, Availability, and	
	Anchoring and Adjustment.	
	2. Schemas: Impact of schemas on social cognition (Attention,	
	encoding and retrieval, Priming and Schema persistence).	
	3. Sources of error in social cognition: Optimistic bias, Negativity	4.4
	bias and Counterfactual thinking.	11
	4. Non-verbal communication: Basic channels (Facial	
	expressions, Eye contact, Body language and Touching).	
	5. Theories of attribution: Jones and Davis Correspondent	
	inference theory and Kelley's covariation theory.	
	6. Basic sources of error in attribution: Correspondence bias,	
	Actor observer effect and Self-serving bias.	
	CHAPTER IV: SOCIAL PERCEPTION	
	1. Impression formation: Foundational research on first	
	impressions (Central and peripheral traits), How quickly and	
	accurately are first impressions formed and Can first	
(a=6)	impressions be changed?	2
ONUNIVERS	2. Impression management: Tactics for looking good and how	
	well do impression management tactics work?	11
6/600	3. Cognitive dissonance: Theory of cognitive dissonance.	35 \ Q
ALEGA	4. Strategies for avoiding dissonance: post-decision dissonance,	A / A
	Illusion of irrevocability hypothesis, justification of effort,	
The state of the s	Counter-attitudinal behavior, justifying cruelty, justifying our	
विमाविका	immoral acts, Avoiding temptations and The hypocrisy	
Congress of the Congress of th	paradigm.	
	PSYCHOLOGY PRACTICUM	
	<b>Experiments:</b> Any 05 from the list given below	
	1. Impression formation	
	2. Reliability of testimony/Suggestibility	
	3. Serial position effect in learning	
	4. Judgement of emotions from facial expressions	
	5. Word superiority effect (Coglab)	
	6. Verbal conditioning	20
	7. Bystander effect	30
	8. Conduct an interview (sample size = 5) to study any one of the	
	following: Effect of advertising on consumer behaviour, Tactics	
	of compliance, Impression management among college	
	students	
	Psychological Tests: Any 03 from the list given below	
	1. Conformity Scale	
	2. Prejudice Scale	
	3. Locus of Control Scale	

	4. DAT or David's Battery of Differential Ability (Abstract
	Reasoning)
	5. Personality Test.
Pedagogy	Lectures, PowerPoint presentations, and discussions of socially relevant
reuagogy	situations to enhance learning
	Books for Reference:

**Number of Credits** : 03

: 2024-25 Effective from AY

Effective from AY	: 2024-25	
<b>Pre-requisites</b>	The student should have completed the basic psychology courses in	the
for the course	previous semesters	
Course Objectives:	<ol> <li>Understand the fundamental concepts of relationships, exploring significance, the impact of early relationships, and key the perspectives.</li> <li>Analyze and apply prominent relationship theories (social exattachment, social penetration) to interpret determinants of frie attraction, marriage stages, and professional dynamics.</li> <li>Develop practical skills in effective communication, collaboration emotional intelligence for navigating challenges and unders relationship breakdowns in diverse contexts.</li> </ol>	oretical change, and ship, on, and
		No. of hours
DINIVE	CHAPTER I: UNDERSTANDING HUMAN RELATIONSHIPS	
	<ol> <li>Defining relationships and understanding the importance of relationships</li> <li>Early relationships' and their impact on later relationships</li> <li>Theoretical perspectives in the study of close relationships:</li> </ol>	8
TOURSE DO TO	Evolutionary approaches, Social exchange and Equity approaches, Cognitive-behavioral approaches, Attachment approaches	15
	<ol> <li>What people bring into relationships: attachment styles, conflict, and communication skills, attributions, implicit theories, and expectations</li> </ol>	
Content:	CHAPTER II: CLOSE AND PROFESSIONAL RELATIONSHIPS	
	1. Perspectives on close relationships: the ingredients of close relationships, culture and relationship, the internet and relationships.	
	2. Friendship and love: Determinants of friendship and attraction, Social penetration theory, Gender differences in friendships, Sexual orientation and Love, Gender differences regarding love, Theories of love, the course of romantic love	15
	3. Marriage: Affective structure, Stages of marriage, Challenges to the traditional model of Marriage	
	4. Professional Relationships: Effective communication and collaboration, Leadership impact on workplace relationships, Role of Emotional intelligence.	

34

	CHAPTER III: THREATS TO RELATIONSHIPS, RELATIONSHIP
	SATISFACTION AND COMMITMENT, AND RELATIONSHIP
	BREAKDOWN
	1. Threats to Relationships: Loneliness and Social Isolation, The
	Process of Dyadic Coping, Lying and Deception in Close
	Relationships, Extradyadic Relations and Jealousy, Intimate
	Violence
	2. Determinants of Relationship satisfaction: Social Exchange and
	equity, Intimacy, Self-disclosure, Social comparison, Social
	networks, Attachment, Inter-dependence theory,
	Communication
	3. The Breakdown of a relationship: Relationship dissolution model
	1. A blend of traditional teaching techniques- lecturing and problem-based
	learning may be used in the classroom.
	2. The ideas addressed in this course can be better explored through
Pedagogy	experiential learning tools such as group discussions, role play, debates,
0 0,	flipped learning demonstrations and sharing of experiences, among
G=8)	others, during lectures.
OAUNIVERS	3. Facilitators are also encouraged to use ICT tools such as Power Point
	Presentations/ Ted talks/ documentary of science to facilitate
	engagement with syllabus topics.
A S CA	Books for Reference:

	Edition, New-Delhi: Sage Publications India Private Ltd.
	At the end of this course, the learner will be able to:
	1. Demonstrate a thorough grasp of fundamental relationship concepts,
	including the significance and lasting impact of early relationships;
	2. Understand the key theoretical perspectives;
Course	3. Apply prominent relationship theories (social exchange, attachment,
Outcomes	social penetration) to interpret determinants of friendship, attraction,
	marriage stages, and professional dynamics;
	4. Develop practical skills in effective communication and collaboration and
	5. Apply emotional intelligence to navigate challenges and understand
	relationship breakdowns in diverse contexts.

**Course code** : PSY-241

: DEVELOPING PSYCHOLOGICAL SKILLS

Title of the Course Number of Credits : 3 (1 +2) : 2024-25 Effective from AY

Effective from AY	: 2024-25	
Pre-requisites	The student should have completed the basic psychology courses in	n the
for the course	previous semesters	
Course Objectives:	<ol> <li>Comprehend the basic skills involved in psychological inquiry pr</li> <li>Understand the fundamentals of psychological first aid and it providing immediate support to individuals experiencing tracrisis.</li> <li>Develop skills in dealing with different crises.</li> </ol>	s role in
		No. of hours
Content:	<ol> <li>CHAPTER I: PSYCHOLOGICAL INQUIRY PROTOCOL: THE INTERVIEW</li> <li>Types of interviews</li> <li>Arrangements for the interview</li> <li>Stages in the initial assessment: Opening phase, middle portion, Final phase</li> <li>Communication: Language and non-verbal</li> <li>CHAPTER II: SKILLS IN PROVIDING PSYCHOLOGICAL FIRST AID (PFA)</li> <li>Understanding PFA: Overview of PFA principles, objectives, and its role in immediate crisis support.</li> <li>Basic skills of psychological first aid: Look, listen, and link</li> <li>Assessing immediate needs, prioritizing interventions, and delivering appropriate PFA strategies in different contexts, such as natural disasters, accidents, or community crises, psycho-education, making referrals</li> </ol>	05 05
	<ol> <li>CHAPTER III: COMPLEX REACTIONS AND CRISES RESPONSE SKILLS:</li> <li>Different types of crises: personal, social, health challenges, natural disasters, men made disasters, violence</li> <li>Different complex reactions during crises: panic and anxiety, anger and aggression, self-harm and suicide, prolonged grief, sleep problems, PTSD, flash backs, depression</li> <li>Active listening, empathy, and effective communication strategies in crises.</li> <li>Ethical Considerations: maintaining confidentiality and respecting boundaries, addressing cultural variations in psychological distress, ensuring sensitivity to diverse backgrounds.</li> </ol>	05

### PRACTICUM COMPONENT

## Conduct of Any two psychological inquiry mock interviews

- 3 Case study analysis of crises intervention: Evaluate the effectiveness of psychological first aid interventions through case studies, research findings, and real-world examples, considering both short-term and long-term outcomes.
- The Case Studies should analyse real or hypothetical case studies that involve complex psychological issues.
   Participants can then collaboratively develop intervention strategies, fostering critical thinking and problem-solving skills.

#### **Qualitative Practicum:**

- Focus group discussion (with 5-8 participants), interviews (with minimum 3 participants), or survey (around 25 participants) on strategies used in times of crises. Adaptive coping, maladaptive coping, and addressing highly negative emotions (guilt and shame). Compilation of data to be done in practical batches- for coding common emerging themes.
- Qualitative assessment: Diary methods in psychological research: Entries related to qualitative analysis of feelings/emotional well-being; observing students' progress through the semester.
- Reflective Journaling: Incorporate reflective journaling as a practicum component, encouraging participants to document their experiences, emotions, and insights during simulated or real-life situations. This promotes selfawareness and continuous improvement.
- Assessment and Prioritization: Training on assessing immediate needs and prioritizing interventions based on the severity of psychological distress.
- Multicultural Sensitivity Training: Design exercises and activities that focus on developing cultural competence and sensitivity. This can include scenarios that challenge participants to adapt their psychological skills to diverse cultural contexts.

A minimum of 06 entries and a maximum of 10 hours have to be journaled by the student.

The format to be followed in dairy entries (minimum 5) is as follows:

### **Reflection questions:**

Incident: (Description): What happened

	Insight and awareness: What were you thinking and feeling
	(Cognitive process and emotional awareness)
	<ul><li>Evaluation: what was good and bad about the process?</li></ul>
	Analysis: what sense can you make about the process?
	Conclusion: What else could you have done?
	Action plan: if it arose again what can you do?
	Workshop/ skill training: (any two of ten hours each)
	Anger management after a traumatic experience Discuss
	how the anger is affecting their life (for example,
	relationship with family members and friends, parenting).
	Crisis Simulation Exercises: Develop crisis simulation
	exercises to help participants navigate and respond to
	simulated psychological emergencies. This could include
	scenarios like natural disasters, accidents, or community
	crises.
	Role-Playing Scenarios: Create realistic role-playing
	scenarios that simulate various psychological challenges,
G-6	allowing individuals to practice and refine skills such as
NOA UNIVERS	active listening, empathy, and providing support in
	different contexts.
6/4388	Field trips to visit hospital OPD to understand the nature
	of critical care
	1. A blend of traditional teaching techniques- lecturing and problem-based
THE PARTY OF	learning may be used in the classroom.
विमा विषा	2. The ideas addressed in this course can be better explored through
- Children - Chil	experiential learning tools such as group discussions, role play, debates,
Pedagogy	flipped learning demonstrations and sharing of experiences, among
	others, during lectures.
	3. Facilitators are also encouraged to use ICT tools such as Power Point
	Presentations/ Ted talks/ documentary of science to facilitate
	engagement with syllabus topics.
	BOOKS FOR STUDY:
	1. Korchin, S. J. (1980). Clinical psychology and minority
	problems. <i>American Psychologist</i> , 35(3), 262–269.
	2. Kaplan, H. I., & Sadock, B. J. (1998). Kaplan and Sadock's synopsis of
Books for	psychiatry: Behavioral sciences/clinical psychiatry (8th ed.). Williams &
Reference	Wilkins Co.
	3. PSYCHOLOGICAL FIRST AID GUIDE for Ohio's Colleges and Universities.
	(2020,)
	4. Psychological First Aid for Red Cross and Red Crescent Societies was
	developed by the IFRC Reference Centre for Psychosocial Support
Course	At the end of the course, the students will be able to:
Outcomes	1. Develop the basic skills involved in psychological inquiry protocol;

- 2. Understand the fundamentals of psychological first aid and its role in providing immediate support to individuals experiencing trauma or crisis and
- 3. Develop skills in dealing with different crises

Course code : PSY-202

Title of the Course : SOCIAL INFLUENCE AND GROUP PROCESSES

Number of Credits : 3T + 1P Effective from AY : 2024-25

Effective from AY	: 2024-25	
Pre-requisites	The student should have completed the basic psychology courses a	nd the
for the course	regular BA degree requirements.	
	1. Understand the various aspects of social influence.	
Course	2. Identify the many facets of groups, individuals and environment	i.
<b>Objectives:</b>	3. Assess the motives underlying prosocial behaviour and evalu	uate the
	causes of aggression.	
	Taylan D	No. of
	wild as	Hours
	CHAPTER I: SOCIAL INFLUENCE	
	1. Conformity: Social pressure, Research on conformity, How	
	social norms emerge? and Social foundations of conformity	
	(Normative social influence and Informational social	
a A	influence).	2)
OAUNIVERS	2. Factors affecting conformity: Cohesiveness and conformity,	
	Conformity and group size, Conformity and status within a	SALL
6/438	group and Descriptive and injunctive social norms.	11
	3. Reasons for nonconformity: Actor observer effect revisited,	AIA
	Power as a shield against conformity, The desire to be unique	
Carlo Hall	and nonconformity and the benefits of nonconformity.	
शिवप्राविष	4. Minority influence.	
Selfenge & Dir	5. Compliance: Underlying principles of compliance and Tactics	
Content:	of compliance	
Content	6. Obedience: Milgram's study, why destructive obedience	
	occurs and Resisting effects of destructive obedience	
	CHAPTER II: GROUPS, INDIVIDUALS AND ENVIRONMENT	
	1. Groups: Types, components, benefits and costs: Social	
	facilitation, Social loafing, Techniques for reducing social	
	loafing and Deindividuation.	
	2. Group decisions: Group-think and Group polarization.	11
	3. Social psychology and sustainable future: Conveying and	
	changing social norms, Keeping track of consumption,	
	Introducing competitiveness, Inducing hypocrisy and	
	Removing small barriers to achieve big changes.	
	CHAPTER III: PROSOCIAL BEHAVIOUR	4.4
	1. Motives underlying prosocial behaviour: Evolutionary	11
	perspective, Social exchange and Empathy and altruism.	

		ı
	2. Personal qualities and prosocial behaviour: Individual	
	differences, Gender differences, Cultural differences, Religion and Mood.	
	3. Situational determinants of prosocial behaviour: Environment	
	(Rural / urban), Residential mobility, Number of bystanders	
	(Bystander effect), The five steps of helping behaviour,	
	Diffusion of responsibility in cyberspace and Effects of media	
	(Video games and music lyrics).	
	4. Factors that increase helping: Similarity, Exposure to prosocial	
	models, Playing video games, Feelings that reduce our focus	
	on ourselves and Social class.	
	5. Factors that reduce helping: Social exclusion, Feelings of	
	anonymity and Economic value.	
	6. Crowdfunding: A new type of prosocial behaviour.  CHAPTER IV: AGGRESSION.	
	1. AGGRESSION: Perspectives on aggression (Biological factors,	
	Drive theory and Modern theories of aggression).	
	2. Basic sources of aggression: Frustration and Direct	~
SINVE	provocation.	ERE
	3. Social causes of aggression: Media violence, Effects of media	
	violence and Individual differences in aggression (Hostile	18/2
	attributional bias and Narcissism).	12
	4. Gender and aggression.	
Carlo ENE	5. Situational determinants of aggression (Temperature	
श विमा विषा	aggression, Alcohol and aggression and Gun availability).	
Mage 500 C	6. Aggression in classroom and workplace: Bullying,	
	Cyberbullying and Reducing bullying.  7. Prevention and control of aggression: Punishment, Self-	
	regulation, Catharsis and Thinking non-aggressive thoughts	
	PSYCHOLOGY PRACTICUM	
	Experiments: Any 05 from the list given below	
	Effect of group opinion on individual judgment	
	2. Social Facilitation	
	3. Cooperation and Competition	
	4. Memory for names and faces	
	5. Risky Decisions (Coglab)	
	6. Nature of tasks and task performance	30
	7. Free Association	
	8. Attribution	
	9. Interview Method: study any one of the following: Social	
	loafing, Cyber bullying, Gender and aggression, Stereotypes <b>Psychological Tests:</b> Any 03 from the list given below	
	Aggression Scale	
	Prosocial Behaviour Scale	

	2. Internal to control
	3. Interest Inventory
	4. DAT (Space Relations)
	5. Adolescent Coping Scale
Pedagogy	Lectures, power point presentations, discussions of socially relevant
	situations to enhance learning

Course Code : PSY-300

Title of the Course : PSYCHOLOGICAL TESTS AND MEASUREMENTS

Number of Credits : 3T + 1P Effective from AY : 2024-25

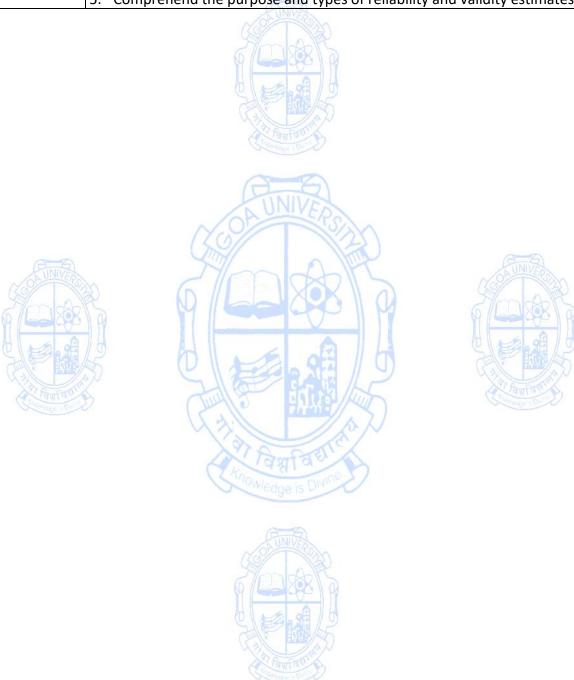

Dro roquisitos	V.0/ 1 N/A/	c andin
Pre-requisites for the Course:	The student should have completed the basic psychology course	S allulli
for the Course:	addition to completing the regular BA degree requirements.	
	1 Understand the fundamentals of psychological testing.	
Course	2 Recognise the ethical implications of psychological testing.	
Objectives:	Analyse the current trends and future direction of psychological te	sting.
	<ul> <li>Explore the steps involved in developing a psychological test.</li> <li>Understanding the purpose and types of reliability and validity est</li> </ul>	imatos
	oriderstanding the purpose and types of reliability and validity est	No. of
	QUALITY OF THE PARTY OF THE PAR	Hours
	CHAPTER I: INTRODUCTION TO PSYCHOLOGICAL TESTING	
	1. Definition, History and Purpose of Psychological Testing:	
	Definition of a Psychological Test, Historical development of	
ON UNIVERS	psychological testing, Importance of Psychological testing in	
	various fields	
9 6	2. Types of Psychological Tests: Classification based on purpose	5 \ 64
A COM	(aptitude, personality, intelligence, interest), Classification based	a / 6
	on administration format (Performance, verbal/paper pencil),	
(1)	Classification based on setting (individual, group)	
Total and a second	3. Ethical and Social Implications of Testing: Responsibilities of test publishers, Responsibilities of test users	
	4. Rights of test takers: The right of informed consent, right to be	15
	informed of test findings, right to privacy and confidentiality, right	13
	to the least stigmatizing label	
	5. Test Administration Procedures: Preparing the test environment,	
	Preparing the test taker, Preparing of the examiner	
	6. Testing special populations: Test takers with physical or mental	
	challenges, Test takers with learning disabilities, Test takers from	
	multicultural backgrounds	
	7. Computerized Test development: Advantages and challenges of	
	computerized testing, Computer adaptive testing (CAT) and its	
	benefits	
	8. The future of psychological testing: Trends in testing	
	CHAPTER II: TEST DEVELOPMENT AND DESIGN	
	1. Test Conceptualization: Steps involved in developing a	
	psychological test, Norm-referenced versus criterion-referenced	15
	tests, Pilot work	-
	2. Test Construction: Scaling, writing items, Scoring items	
	3. Test tryout	

	4. Item analysis: Item difficulty index, Item reliability index, Item	
	validity index, Item discrimination index, Qualitative item analysis	
	5. Test revision: Test revision as a stage in new test development,	
	Test revision in the life cycle of an existing test, Use of Item	
	Response Theory (IRT) in building and revising Tests, Developing	
	scoring criteria and rubrics for subjective items	
	6. Innovations in Test Development: Integrating technology,	
	artificial intelligence and data analytics in test creating, Ethical	
	considerations in the use of emerging technologies	
	7. Interpreting test scores: Frequency distribution, The Normal	
	Curve, Descriptive Statistics, Standard Scores, Norms	
	8. Feedback and reporting: General guidelines in communicating	
	test results, Format for a Psychological Report, Ethical	
	considerations in providing test feedback	
	CHAPTER III: RELIABILITY AND VALIDITY	
	1. Sources of Error Variance: Test construction, Test administration,	
	Test scoring and interpretation, Other Sources of error	
	2. Classical Test Theory	
RUNIVE	3. Reliability Estimates: Test-retest reliability estimates, Parallel-	
	forms and alternate forms reliability estimates, Split-half	
	reliability estimates, Internal Consistency estimates, Measures of	3/2
7	Inter-scorer reliability	15
0 1	4. Interpreting a Coefficient of reliability	
	5. The purpose of reliability coefficients	
or fautaute	6. Factors that influence reliability	X
Dichelenge - Div	7. Validity and validity estimates: Face validity, Content validity,	
	Criterion validity (Predictive and concurrent), Construct validity	
	8. Threats to Validity: Common sources of invalidity in testing,	
	Minimizing construct-irrelevant variance and other threats	
	PRACTICUM Wedge is Divin	
	Any 1 test from each of the five categories	
	Theme: Intelligence testing	
	a) WAIS (Pearson)	
	b) Bhatia Battery of Performance Intelligence Test	
Content:	(Psychometrics)	
	c) Binet Kamat Intelligence Test (BKT) (Psychomatrix)	30
	2. Theme: Personality testing	30
	a) 16 PF Questionnaire (any one form A-E) Indian	
	(Psychotronics)	
	b) TAT India set of cards by Uma Chowdary (any 3 cards)	
	(Psychometrics)	
	c) Eysenck Personality Questionnaire R (Psychomatrix)	
	3. Theme: Specific population/specific ability testing	

	a) Children Apperception Test – Animal (Indian Adaptation) by
	Uma Choudary (Psychometrics)
	b) Passi Test of Creativity by B. K. Passi (Psychotronics)
	c) Cognitive and Linguistic Quick Test (Pearson)
	4. Theme: Adjustment/Value/interest testing
	a) Adjustment Inventory for College Students by A. K. P. Sinha
	and R. P. Singh (English) (Psychometrics)
	b) Value Orientation Scale by N.S. Chauhan and S. Aurora
	(English) (Psychotronics)
	c) Vocational Preference Inventory (Psychotronics)
	5. Theme: Ability testing
	a) DAT (any 3 subtests)/David's Battery of Differential
	Olympia Distriction of the Control o
	Abilities (Psychotronics)
	b) Finger dexterity board/test (Psychotronics)
	c) Vocational preference inventory (Psychometrics)
	1 A blend of traditional teaching techniques- lecturing and problem-based
	learning may be used in the classroom.
	The Ideas addressed in this course can be better explored through
OBUNIVERS	experiential learning tools such as group discussions, role play, debates,
Pedagogy:	flipped learning demonstrations and sharing of experiences, among others,
6/11/808	during lectures.
	2. Facilitators are also encouraged to use ICT tools such as Power Point
	Presentations/ Ted talks/ documentary of science to facilitate engagement
	with syllabus topics.

Effective from AY	: 2024-25	
Pre-requisites for the Course:	Students are expected to have fulfilled the basic psychology requirements in preceding semesters, alongside meeting the criteria for obtaining a BA degree	
Course Objectives:	<ol> <li>Develop an understanding of the fundamental aspects of edupsychology and, the key components of effective teaching.</li> <li>Evaluate the significance of instructional planning and planning in education.</li> <li>Investigate the impact of technology impact on education and strategies for meeting diverse needs.</li> <li>Acquire skills in classroom management and structuring smartivities.</li> <li>Assess the challenges faced by students with achievement pand the role of the classroom in educational assessm performance evaluation.</li> </ol>	effective d explore all-group problems
	9/66/200	No. of Hours
Townson - Do	<ol> <li>CHAPTER I: EDUCATIONAL PSYCHOLOGY: A TOOL FOR EFFECTIVE TEACHING</li> <li>Educational Psychology: Nature, Aspects, and Scope</li> <li>Exploring Educational Psychology: Historical Background, Teaching: Art and Science</li> <li>Learning and Teaching today and the Role of Educational Psychology</li> <li>Effective Teaching: Professional Knowledge and Skills; Commitment, Motivation, and Caring</li> <li>Multicultural Education</li> </ol>	15
Content:	CHAPTER 11: PLANNING, INSTRUCTION, AND TECHNOLOGY  1. Instructional Planning, Time Frames and Planning  2. Teacher-Centred Lesson Planning and Instruction  3. Learner-Centred Lesson Planning and Instruction  4. Technology and Education Teaching  5. Education for Exceptional Learners	15
	CHAPTER 111: TEACHING, LEARNING AND MANAGING THE CLASSROOM  1. Teachers and Peers as Joint Contributors to Student Learning 2. Structuring Small - Group Work 3. Learning and Thinking Styles 4. Effective Classroom Management	15

	5. Dealing with Problem Behaviours	
	CHAPTER 1V: MOTIVATION, ACHIEVEMENT AND	
	EDUCATIONAL PERFORMANCE	
	1. Exploring Motivation	
	2. Achievement Processes	
	3. Motivation, Relationships and Socio-cultural Contexts	15
	4. Students with Achievement Problems	
	5. The Classroom as an Assessment Context	
	(students should be taken on a field trip to visit counselling	
	centers and child guidance clinics)	
	1. A blend of traditional teaching techniques- lecturing and p	oroblem-
	based learning may be used in the classroom.	
	2. The ideas addressed in this course can be better explored	through
	experiential learning tools such as group discussions, r	
Pedagogy:	debates, flipped learning demonstrations and sharing of expe	eriences,
	among others, during lectures.	
	3. Facilitators are also encouraged to use ICT tools such as Pov	
NINVES	Presentations/ Ted talks/ documentaries to facilitate engagem	ient with
	syllabus topics.

	structuring, adapting to diverse learning and thinking styles ar	
	5. Assess challenges faced by students with achievement proble	ems, and
	develop competence in addressing diverse student needs.	

Semester VII

Name of the Programme : BA PSYCHOLOGY

Course code : PSY-400

Title of the Course : PSYCHOMETRICS

Number of Credits : 04 Effective from AY : 2024-25

Effective from AY	: 2024-25	
Pre-requisites for the course	Students are expected to have fulfilled the basic psychology requirements in preceding semesters, alongside meeting the criteria for obtaining a BA degree	
Course Objectives:	<ol> <li>To familiarize students with psychometric concepts, theoryand pof test construction.</li> <li>To understand the application and contextual interpretation of depsychological measurement.</li> </ol>	•
	0	Hours
	<ol> <li>CHAPTER I: THEORETICAL - CONCEPTUAL ORIENTATION</li> <li>The development of psychometrics: The history of psychometrics, psychometrics today.</li> <li>Test development: The process of test construction, constructing your own questionnaire.</li> <li>Psychometric properties: Item analysis, reliability, validity, standardisation and normalisation.</li> <li>Ethical considerations and future of psychometrics: Issues in intelligence testing, ethical test use and integrity testing, psychometrics in the information technology age.</li> </ol>	15
Content:	<ul> <li>CHAPTER II: INTELLIGENCE, APTITUDE, PERSONALITY</li> <li>AND NEURO-PSYCHOLOGICAL TESTING</li> <li>1. Intelligence: Measurement of Intelligence - Wechsler Intelligence Scales, Ravens Progressive Matrices</li> <li>2. Aptitude: Measurement of Aptitude - David's Battery of Differential Abilities (DBDA), Scholastic Aptitude Test</li> <li>3. Personality: Measurement of Personality-NEO PI-R, MMPI-2</li> <li>Neuropsychology: Neuropsychological Assessment-The Luria-Nebraska Neuropsychological Battery, Screening for alcohol use disorders.</li> </ul>	15
	CHAPTER III: PROJECTIVE TESTING  1. Classification of personality tests  2. Inkblot Tests: Rorschach test, Alternative inkblot tests-Holtzman inkblot  3. Apperception Tests: Thematic Apperception Test, Alternative apperception procedures- CAT  4. Non-pictorial Projective procedures: word association test, sentence completion test	15

82

	CHAPTER IV: PSYCHOMETRIC APPLICATIONS		
	1. Using psychometrics in clinical psychology: Identifying specific		
	learning disabilities		
	2. Using psychometrics in educational settings: Measuringability 15		
	and achievement in school children		
	3. Testing special population: Infant and Preschool assessment		
	4. Psychometric assessment of personality in occupational		
	settings: The big Five model, Orpheus, The Orpheus scales		
	1. The teaching –learning techniques used in the classroom can include		
	lectures, tutorials, presentations, reading, individual and group		
	experiential learning activities like diary writing, personal reflections,		
	classroom discussions, presentations and sharing of experiences from		
Pedagogy	social context.		
	2. The ideas addressed in this course can be better explored through the		
	use of ICT and mass media and web based sources like documentaries,		
	Ted talks, films etc. tools to facilitate engagement with topics in the		
	syllabus and to make the teaching-learning process interactive,		
	interesting and fruitful.		
UNIVEO	1. Rust, J. &Golombok. (2020). Modern psychometrics: The science of		
39/	psychological assessment, (4 <sup>th</sup> ed.). New York: Psychology press.

Title of the Course : PRACTICUM: EXPERIMENTS AND TEST

Number of Credits : 04 Effective from AY : 2024-25

Effective from AY	: 2024-25	
Pre-requisites for the course	Students are expected to have fulfilled the basic psychology requirements in preceding semesters, alongside meeting the criteria for obtaining a BA degree	•
Course Objectives:	<ol> <li>To equip students with skills in conducting experiments invariou of psychology.</li> <li>To familiarize students with various types of psychological test administration, and interpretation.</li> </ol>	
		No. of Hours
Content:	PART ONE: EXPERIMENTS I - EXPERIMENTS (any 4)  1. Divided Attention 2. Finger Dexterity 3. Frustration on Performance 4. Maze Learning 5. Mental Fatigue 6. Organization in Memory 7. Problem Solving 8. Selection and Grouping in Perception Coglab Experiments: (any one) 1. Memory Judgment 2. Link Word 3. Phonological Similarity Effect 4. Sternberg Search	30
	II - DESIGNING AN EXPERIMENT  Experimental designs:  1. Between-subjects design 2. Within-subjects design 3. Pretest- Post test design 4. AB design 5. ABA design 6. Multiple baseline design  Each student has to choose any one area and design an experiment based on the above experimental designs. The areas are: Perception, Memory, Attention, Imagery, Spatial Cognition. The individual experiment designed by each student has to be computerized using open-source package (e.g. PEBL, Open	

	Sesame, etc.) and presented in a CD for internal assessment.	
	PART TWO: TESTS	
	I: PSYCHOLOGICAL TESTING	
	Any 5 of the following tests: Administration, analysis and	
	interpretation.	
	Revised Amsterdam Kinder Intelligence Test (RAKIT)	
	Dr. Bhatia's Battery of Performance Test of Intelligence	
	Wechsler Adult Performance Intelligence Scale (WAPIS)	
	4. Bender Visual Motor Gestalt Test	
	5. PGI Battery of Brain Dysfunction	
	6. David's Battery of Differential Abilities (DBDA)	
	7. Minnesota Multiphasic Personality Inventory (MMPI)	
	8. Eight State Questionnaire (8SQ)	
	9. Rorschach Inkbot Test	
	10. Thematic Apperception Test (TAT)	
	II: SKILLS TRAINING EXERCISE 3	30
	Developing a Test. The newly developed test has to be	
	administered to a minimum of 10 individuals. The item analysis,	
UNIVE	reliability, validity, and norms are to be computedand reported in	
39	the journal.

Course code : PSY-405

Title of the Course : Supervised Practicum

Number of Credits : 04 Effective from AY : 2024-25

Effective from AY	: 2024-25	
Pre-requisites for the course	Students are expected to have fulfilled the basic psychology requirements in preceding semesters, alongside meeting the criteria for obtaining a BA degree	-
Course Objectives:	<ol> <li>To understand techniques of assessment and report we mental health settings.</li> <li>To develop knowledge to administer and interpret psychologists.</li> <li>To develop planning and organization skills throughinteract experiential learning.</li> <li>To analyze case studies for problem identification and manaplan.</li> </ol>	nological
	(36)	No. of Hours
Tanta Visiting To The Control of the	<ol> <li>CHAPTER I – THERAPEUTIC INTERVENTION: OVERVIEW</li> <li>Rapport building and understanding client distress         <ul> <li>Taking a case history, conducting Mental Status Examination,</li> </ul> </li> <li>Learning Disability Screening         <ul> <li>NIMHANS (SLD) Battery, Wechsler Individual AchievementTest (WIAT) III</li> </ul> </li> <li>Formulating and executing the intervention plan</li> <li>Case analysis and Case conferences</li> <li>Assessment will be conducted through simulated role-play exercises, movie reviews, group discussions</li> </ol>	15
Content:	<ol> <li>CHAPTER II – OBSERVATION AND COMMUNITY OUTREACH</li> <li>Observation in various field settings: NGOs, schools, private practitioner clinics, companies and industrial/corporate organizations.</li> <li>Observation log book to be maintained.</li> <li>Organizing and conducting workshops for specific target groups (adolescents, parents, educators, employees etc.) to promote awareness and engage in psycho-education on critical psychological issues</li> </ol>	15
	CHAPTER III - CLIENT INTERACTION AND CASE WRITING 6 cases to be assessed: Child – 01, Adolescents – 01, Adults – 02, Geriatric – 01, Special Case-01	30

T
(Special case: individuals with any specific pathology e.g. LearningDisability, ADHD, Eating Disorder, Depression)
The student has to maintain a journal to include the following:
Detailed Case history, Mental Status Examination, testing
rationalewith basic test details, test interpretation, points to
consider, suggested interventions, and prognosis.
Every 15 students will be supervised by one teacher.
1. The teaching-learning techniques used in the classroom can include
lectures, tutorials, presentations, reading, and individual and group
activities with discussions.
2. Use of Psychological Assessment tools, and placements of students
in various community centers, mental health facilities, geriatric
facilities, and educational institutions to obtain case data.
OR UNIVERSITY
At the end of this course, the learner will be able to:
1. Examine case studies for problem identification And management
plan;
2. Administer and interpret psychological assessment tools to Target
groups;
3. Demonstrate planning and organization skills by conducting
Workshops on selected topics related to mental health and
4. Apply appropriate treatment goals in collaboration with the Client.

Title of the Course : NEUROPSYCHOLOGY

Number of Credits : 04

Effective from AY : 2024-25

Effective from AY	: 2024-25	
Pre-requisites for the course	Students are expected to have fulfilled the basic psychology requirements in preceding semesters, alongside meeting the state of criteria for obtaining a BA degree	
Course Objectives:	<ol> <li>To understand the structure and functions of the nervoussystem.</li> <li>To highlight the link between behavior, mental processes and biol processes.</li> <li>To understand the application of cognitive and biological foundation clinical practice.</li> </ol>	
	CHANGE OF THE PARTY OF THE PART	No. of Hours
Content:	CHAPTER I – FOUNDATIONS OF BIOPSYCHOLOGY &  NEUROPSYCHOLOGY  1. Structure and Functions of the Nervous System: The Central Nervous System, The Peripheral Nervous System, 2. Communication in the Nervous System: Cells of the Nervous System, How neurons communicate. 3. The Visual System 4. Audition, The Body Senses and Chemical Senses  CHAPTER II – NEURO-PSYCHOLOGICAL BASIS OF BEHAVIOR 1. Learning, Language and Memory: The nature of learning, Learning and synaptic plasticity; Cortical localization of language, The Wernicke-Geschwind model; Relational learning Human anterograde amnesia, spared learning abilities, declarative and non- declarative memory 2. Emotions: Emotions as response patterns; Facial expression of emotions; Neural basis of the communication of Emotions - Recognition and Expression 3. Sexual and reproductive behavior: Hormonal control of Sexual behavior, Neural mechanisms in sexual behavior 4. Sleep and Biological Rhythms: A physiological and behavioral description of sleep, Physiological mechanisms of sleep and waking.  CHAPTER III—NEUROPLASTICITY 1. Phases of neural development: Induction of the neural plate, Neural proliferation, migration and aggregation, axon growth and synapse formation, neuron death and Synapse	15 15

	<ol> <li>Causes of brain damage: Brain tumors, Cerebrovascular disorders, Closed head injuries, Infections of the brain, Neurotoxins, Genetic factors, Programmed cell death</li> <li>Responses to Nervous system damage: Neural degeneration, Neural regeneration and Neural reorganization</li> <li>Neuroplasticity and the treatment of CNS damage: Promotion of recovery from CNS damage by rehabilitative training, Genetic engineering, Neurotransplantation.</li> </ol>	
	CHAPTER IV. NEUROPSYCHOLOGICAL BASIS OF SPECIFIC	
	DISORDERS	
	Degenerative Disorders	15
